

WATER BUILDS OUR ECONOMY?

A stable secure long-term water supply is the foundation on which Arizona's growing economy is built.

ARIZONA WATER FACTS 

ArizonaWaterFacts.com [#WaterYourFacts](#)

A stable secure long-term water supply is the foundation on which Arizona's growing economy is built. Key industries not only contribute to our economic growth, but have played significant roles in managing our water supplies. Learn how Arizona's industries thrive while being efficient in their water use.

AGRICULTURE

ARIZONA'S AGRICULTURAL INDUSTRY

PROVIDES MORE THAN
88,000
FULL AND PART-TIME
ARIZONA JOBS

AND CONTRIBUTES OVER
\$17 BILLION

TO OUR ECONOMY

Arizona's agricultural communities are some of the most efficient water users in the nation. In the central portion of Arizona agricultural water users are required by state law to implement water conservation practices including lining canals, laser leveling of fields and other best management practices.

MINING

ARIZONA'S MINING INDUSTRY

PROVIDES OVER
51,000

LOCAL JOBS

AND CONTRIBUTES
\$4.8 BILLION
TO THE STATE'S

ECONOMY

Arizona mines are a model of efficient industrial water use. Many mines in Arizona recycle a majority of their process water through capture of tailings water for uses within the operation. This has the impact of reducing their overall fresh water demands and impacts on available water resources.

GOLF

ARIZONA'S GOLFING INDUSTRY

\$3.4 BILLION
IN ECONOMIC OUTPUT

OVER HALF
OF ALL WATER USED FOR GOLF
COURSES IN THE AMAs IS FROM A
RENEWABLE SOURCE

Arizona mines are a model of efficient industrial water use. Many mines in Arizona recycle a majority of their process water through capture of tailings water for uses within the operation. This has the impact of reducing their overall fresh water demands and impacts on available water resources.
