## Do We Have Enough?

Arizona has developed a diverse portfolio of water supplies and management strategies which serve as the foundation of our State's robust water system, however we are not without challenges.

The Colorado River system, which supplies forty percent of Arizona's total water use, has experienced extensive drought conditions for the past 16 years. While this is cause for concern, these conditions are not unexpected. Arizona has been proactively building resilience and implementing innovative water management strategies to secure dependable water supplies.
